

## 2017 Middle School Earth Science/STEM Teacher Leadership Academy

ExxonMobil Exploration and the American Geosciences Institute are pleased to announce that they will be holding the ninth annual national Leadership Academy in Earth science and STEM for middle school teachers **July 16-21, 2017**. The program will be held in Houston, and begins with a reception and dinner on the evening of Sunday, July 16<sup>th</sup>, and concludes at noon on the 21<sup>st</sup>.

The academy will provide teachers with Earth science content, hands-on activities, resources and real-world science experiences that they can use with their students in the classroom and with their colleagues in professional development settings. The program will be residential in Houston, and all academy-related travel, lodging, and subsistence costs will be covered by a grant from ExxonMobil. We have space for up to **25 participants** and encourage teams of three or four to attend from each state or school district (although this is not a requirement).

In the year following the academy, participants are asked to extend the program's impact by conducting one or more teacher professional development workshop sessions at local, regional, and/or national science education meetings. Preparation for these sessions begins during the academy.

Topics covered during the 40 hours of the workshop will include:

- Introducing Earth system science to students;
- Teaching Earth science with an emphasis on STEM and Science & Engineering Practices;
- Investigations to help students understand the Nine Big Ideas in Earth Science (From the *Earth Science Literacy Principles*);
- Teaching the seven Energy Literacy Principles;
- Resources for teaching Earth science (e.g., Earth Science Week Kits, and many others);
- The work of geoscientists in the energy industry;
- Planning, conducting and evaluating successful Earth science and STEM workshops.

**We encourage science supervisors and principals to nominate teachers for the Academy by the priority review date of March 1, 2017.**

We are looking for teachers who have the potential to become science professional development leaders in their home school districts. Please send names and e-mail contact information for nominees to Juliet Crowell, Education Pro, American Geosciences Institute, at [jmcrowell@agiweb.org](mailto:jmcrowell@agiweb.org). Please use the subject line "Middle School Teacher Leader Academy Nominee".

A link to the online application form will be sent to each candidate. We will be asking the nominees to send in three items with their completed application form:

1. a **current curriculum vitae or resume** that includes their contact information, educational preparation, teaching and other work experience and any professional development training they have received and/or experience in conducting workshops;
2. a **letter of interest** expressing why they would like to attend the academy;
3. a **letter of recommendation and commitment** from their principal or other school administrator stating that the teacher will be permitted to conduct professional development workshops for their peers within the next year.

More detailed information about travel will be sent to the teachers selected to attend.

Please feel free to send questions to Juliet Crowell, Education Programs Manager, [jmcrowell@agiweb.org](mailto:jmcrowell@agiweb.org).
